Chapter 6 of the book talks about Black Lives Matter as a movement and not a moment. Therefore, the chapter provides a powerful argument on how the Black Lives Movement was formed. The differences between individuals in the United States are presented; however, the author explains that the variations in individuals' experiences, and thus, Americans should come in reality that they have more to do in developing unity. Another main argument is the continuous racism and the injustices that resulted in creating the new movement. Taylor (2016) has successfully presented the argument because the period between 2014 and 2015 was interrupted by black revolts in Ferguson and Baltimore against law enforcement terror. Also, the explanation on the Black women part in the black liberation struggle made me like the text. Women played a significant role in the battle for the Black fighting against racial segregation in the nation. Furthermore, law enforcement's black kids mistreated and endangered at gunpoint resulted in many individuals presenting themselves insisting that their lives matter. This played a role in creating solidarity.

Chapter 7 talks about the shift in the black lives matter to black freedom. The main argument in this chapter is the effects of racism on black and brown individuals. The author has managed to explain this point by stating that the authoritative white men in the nation have acceptable their statutes. Another main argument is how some individuals survive in society by fighting all methods of domination and mistreatment, such as racism and police violence (Taylor, 2016). Nevertheless, what I did like the most in this chapter is how the author has explained colorblindness. Colorblindness is not encouragement but a partisan instrument planned to refute the nation's accountability and free-market capitalism for the differences that continue racial and

economic disparity for the Black Americans. Although people cannot view the past and modern practices of racism, it can destroy the present public institutions.
