Economics Final Project: Personal Finan

- Your final project/presentation should cover three major economic goals that you feel are important enough to deserve planning in order to achieve. The economic goal may be something that you are currently working on right now, such as buying a car, financing college, etc..., or something that is years in the future.
- The project should detail not just your goal, but more importantly how you plan to go about achieving each of your goals/ Remember; this is economics, so focus on that part of your planning. You can start with "I want to own a big home in California" and then continue to explain how you hope to achieve that goal. You should already have information regarding the cost of some things from previous assignments. You may need to do a little more research on one or more of your big economic goals. Detailing what your goal will cost is a potential place to begin on each economic goal.
- A big part of grading for the assignment will be based on how well you have put together a realistic plan to reach your goals, so put some thought into the work.

Ideas/suggestions for major economic goals

- Owning a home or paying for a rental home.
- Education and paying for the education you would like to achieve.
- Career preparation.
- Starting or buying a business.
- Taking a dream vacation.
- Paying for retirement.
- Marriage and supporting a family.
- Paying for a big ticket item such as a car, boat, hobby, etc.
- Making your first million dollars.

• Owning a home
• Paying for a car

• taking a dream vacation

You may use a poster, PowerPoint, flip chart, or a *detailed* essay. If you are not specific on how you plan to achieve your goals, your work will be returned to you for completion. If you have another idea for how to present your information, talk to me.

The project must also include ideas for two supporting graphic elements. This might be a timeline of goals, a chart showing various major elements of your economic goals, a budget, investment plans, or other objects that help with your economic planning. (The key thing is that you must **create** the graphic, *anything simply cut-and-paste will not be considered as your work.*)
