FROM: BWW CLINICAL BOARD OF DIRECTORS

ANTICOAGULANT PRESCRIPTION SUBSTITUTE IN THE PHARMACY

As per the new patients who require blood thinners, the management has stocked **Rivaroxaban**. The drug code is 111- 46A or 111- 46C or request a temporary permit to the Pharmacy, bin 46 from the Pharmacy Department.

We encourage the prescription of Rivaroxaban over Aspirin for patients with a history of heart disease, deep vein thrombosis, and pulmonary emboli. However, the judgment on the drug to use is entirely based on your evaluation prospects of the patient.
