

Individual Project 1: Cell Phone Project

For 10 days, keep a log of

- 1) Number of minutes talking on your cell phone each day,
- 2) Number of text messages you sent each day,
- 3) Number of text messages you received each day, and
- 4) Amount of data used each day of your phone or favorite app.

Then, create

1. a chart of the data and
2. display the data using different methods.

Also, write a 1-page summary of your findings and how it impacts your academic life. Include the positive and negative and if you see a need for change.

All info should be typed and submitted to your professor on or before the due date. Please submit your project using the method your professor prefers.

Items to turn in:

1. Cover sheet (Title, Name, Class, Professor, Due Date)
2. Academic Integrity Agreement
3. Table of Data

[illegible]

--	--	--	--	--

4. Methods of displaying the data (with labels)
 - Double Line Graph for **Texts Received and Texts Sent**
 - Bar Graph for the **Minutes Talked on the phone**
 - Scatter Plot for the **Data Used on your phone or favorite app.**

5. 1-page summary
 - Title only (no name, no professor name, etc)
 - 1' margins
 - 12 font
 - Single spaced (or 2 pgs double spaced)
 - What did you learn about your findings and how your phone usage impacts your academic life and daily functioning? Include the positive and negative and if you see a need for change. Please include which app you collected data from or tell that you used the data from your phone.
 - Grammar counts

*****This project will be used for Taskstream so make sure you save the file to be submitted to Taskstream at a later date in the semester.*****
