NOTE TO WEB DEVELOPER

I am not sure how to set this website up so that it functions easily and simply. I am open to advice. This is how I think it might work but please let me know if you have a better idea…

PRIVATE ESCAPES/GETAWAYS bookings will be priced differently to the Retreat Prices so it needs it's own booking window for each of the three properties.

ORGANISED RETREATS need a booking and payment window for each of the two Retreat Properties (Luxury Beachside Escape description and Historic Country Getaway). When the person clicks on the Retreat they wish to attend, it will take them to the page of the Retreat Property and allow them to click on the different bedrooms (photo and description) and book the one they want.

HOST YOUR OWN RETREATS enables customers to go to either of the two properties (Luxury Beachside Escape description and Historic Country Getaway). Each property page will have a description on the property and retreat features and a booking/payment window to book the whole house out at the Retreat Price.

ALL OF THESE NEED TO HAVE THE SAME CALENDER AS EACH OTHER SO THE DATE THAT IS BLOCKED GETS BLOCKED ON ALL OF THE CALENDERS.

On top of this, the homes are currently advertised on Airbnb and VRBO. I would like the calendars on my website to link with the AIRBNB AND VRBO calendars so that if they are booked via any method, all calendars are blocked for that date.

So essentially if I want to enable people the ability to:

- Book the home/s to host Retreats (because it's different cost than a normal stay)
- Book a Retreat I am operating.
- Book a general stay at home.

I need to be able to easily change/add/remove Retreat Names, Prices, Headings, Photos and Videos when I want.
