

CSCI 6574 Assignment 3

Due: Wednesday, February 19

I. Requirements

1. Please review Chapter 3 slides and watch Chapter 3 lecture video before completing this assignment.
2. Please search and find two different articles or publications for each of the following publication categories. Please list each article in the APA style as the 2 examples below and provide evidence or arguments about their categories (e.g. evidence/argument for peer reviewed articles, etc.)
 - 1) Peer reviewed
 - 2) Editorially reviewed
 - 3) Primary source
 - 4) Secondary source

For example, two publications attached with Assignment 2 are respectively:

- 1) An, X., Xiang, Y., and Cercone, N. (2007). Dynamic Multiagent Probabilistic Inference. *International Journal of Approximate Reasoning*, 48, 185-213.
- 2) An, X., and Huang, J. (2017). geNov: A New Metric for Measuring Novelty and Relevancy in Biomedical Information Retrieval. *Journal of the Association for Information Science and Technology*, 68(11), 2620-2635.

These two articles are both Peer Reviewed since from the websites of the two journals, we can confirm that they claim to publish peer-reviewed research (please watch the lecture video to see how to check).

II. Grading Criteria

1. Articles are listed in APA style [20 marks]
2. Identify 2 different articles for each different category [60 marks]
3. Provide evidence (e.g. a journal website indicates they publish peer-reviewed research) /arguments (e.g., why you think it belongs to articles of primary source based on knowledge from Chapter 3) [20 marks]
