

- **Introduction:**
 - **Start with a story** to describe the usefulness of cell phones in a specific situation related to education, the medical industry and communication
 - **Thesis:** Cell phone applications are useful for education, the medical industry and communication.
- **Body Paragraph 1:**
 - Cell phone applications are useful in education
 - Bring in research to support your claim.
- **Body Paragraph 2:**
 - Cell phone applications are useful in the medical industry
 - Bring in research to support your claim.
- **Body Paragraph 3:**
 - Cell phone applications are useful in communication.
 - Bring in research to support your claim.
- **Conclusion:**
 - Is there an argument against the use of cell phone applications? Some people say that cell phone applications cause distractions. However, as this paper argues, cell phone applications do more to help us survive and thrive as a society than they do harm. Yes, it is important to limit our use of technology, but it is equally as important to...
