

Chapter 11:Nervous System II

Across

4. Spinal cord enlargement between C3 to T2
5. A product of the Ventral horn of the gray matter
7. Feature of CSF that protects the brain from infections
8. Cranial nerve number 1, sensory functions, responsible for olfaction
11. lobe responsible for cognitive functions
13. lobe responsible for sensory information on temperature, taste and touch
16. CSF is a form of a?
17. A bundle of nerves that form the last part of the spinal cord

Down

1. Cranial nerve number 12, motor function, responsible for tongue movement
2. Where the CSF flows through to the third ventricle
3. Lobe responsible for vision
6. Lobe responsible for memory
9. The outermost layer of the meninge
10. CSF protects the brain from physical damage through acting as ?
12. Cranial nerve number 2, sensory functions, responsible for vision
14. The layer of the meninges THAT is composed of loose connective tissue that creates a cushion against physical stress to the brain

18. A product of the dorsal horn of the gray matter

20. The butterfly-shaped central part of the spinal cord composed of neurons

15. Matter The outer lighter part of the spinal cord composed of axons

19. Cranial nerve number 7, mixed sensory and motor functions, responsible for facial expressions and gustation
