

Part A: Reading Maps for Patterns

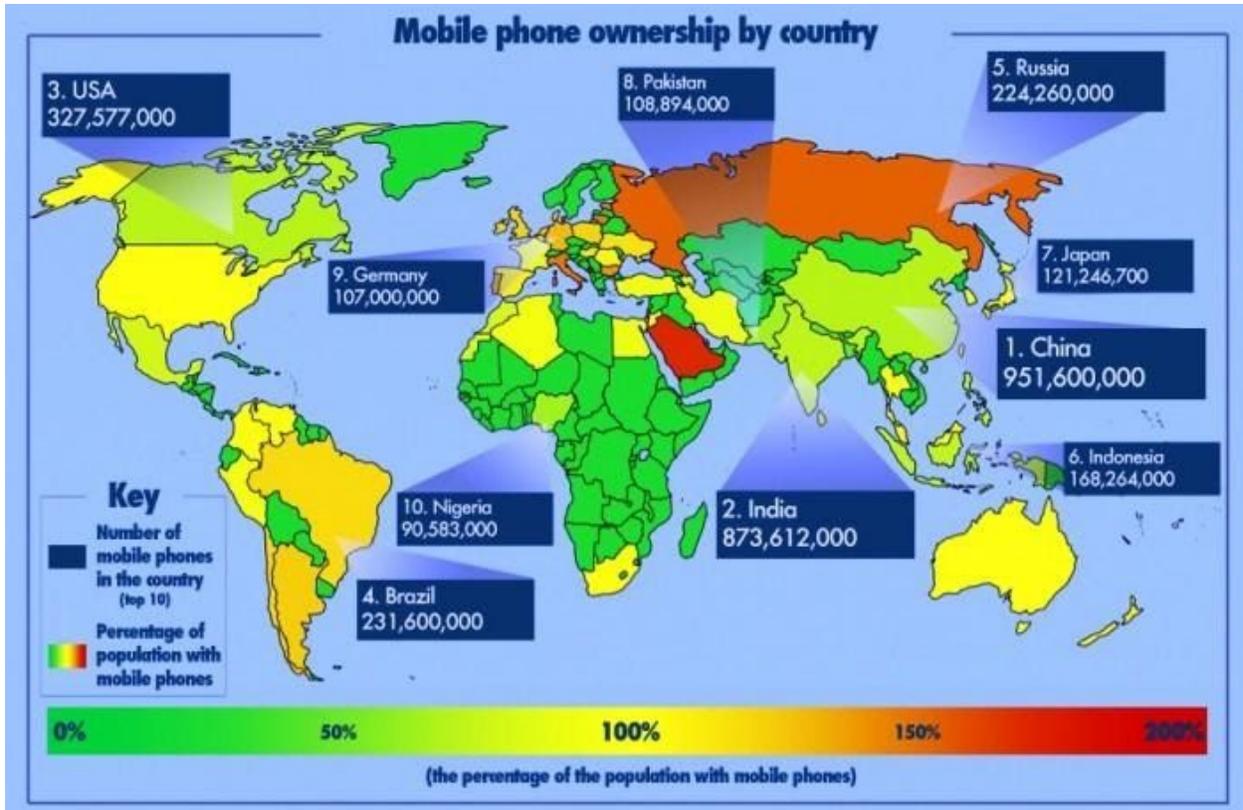

Below this organizer are three maps. Select two, and for each of your selected maps, answer the following questions in order to gather information.

Questions to Answer	First Map Choice	Second Map Choice
What is the title of the map?	mobile phone ownership by country	McDonalds across the world
What is the unit of measurement for the map?		
What pattern do you see?		
How does Canada fit into the global pattern you have observed?		
Would you describe this as a positive or negative pattern? Explain your thinking.		
What do the colours represent?		
Is there more of one colour than other colours? Explain.		
Make a generalization about the pattern you see on the map using words like: <ul style="list-style-type: none"> ● Dispersed: Spread out evenly ● Concentrated: All located in close proximity 		

- **Nucleated:** Multiple areas of small clusters
- **Linear:** Occurring along a curved or straight path
- **Absent:** An area without a record or observation

IQ by Country

Part B: Reading Graphs for Trends

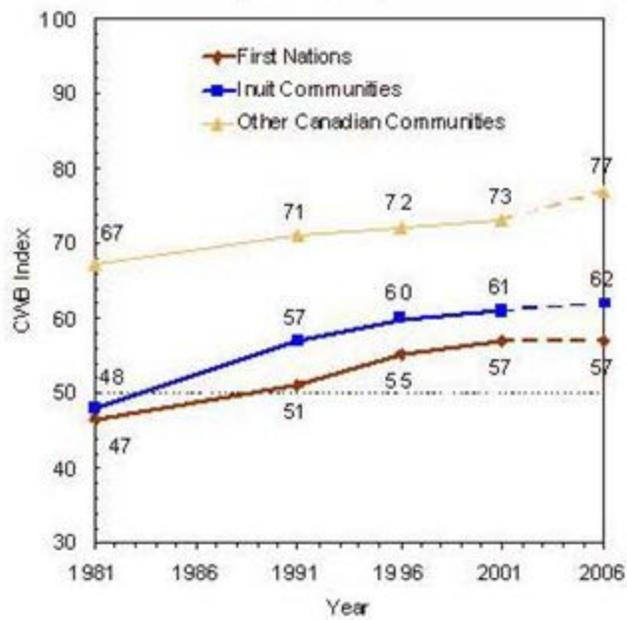

Below this organizer are three graphs. For any two of these graphs, answer the following questions in order to gather information.

Questions to Answer	First Graph Choice	Second Graph Choice
What is the title of the graph?		
What is the unit of measurement for the graph?		
What trend do you see?		
How do you think Canada fits into the trend that you have observed?		
Would you describe this as a positive or negative trend? Explain your thinking.		
How quickly do the lines or bars change the height or width of the axis?		
Make a generalization about the trend you see on the graph using words like: <ul style="list-style-type: none">● increasing● decreasing● irregular● predictable● static		

The value of restaurant sales in the United States 1970-2014 projected
