Description

France's colonial territories were of very high importance after the embarrassment of occupation during World War II. Algeria, in particular, was a complicated case because it involved large numbers of French settlers, the *pieds-noirs*. Despite international support for Algerian independence, right-wing factions in the military and among the colonizers remained committed to staying the course. After Charles de Gaulle presided over French withdrawal, the cause of the *pieds-noirs* has remained divisive in French political life, particularly on the right.
