

Analyzing a Criminal Justice Information System: Shotspotter

Go to www.shotspotter.com. Carefully read the website to find out what Shotspotter is and how it works. After researching the website, you are going to write a two to three page analysis on Shotspotter. **COLLEGE LEVEL ESSAYS ARE EXPECTED FOR THIS PROJECT. YOU ARE EXPECTED TO CREATE A SEPARATE COVER PAGE WITH APPROPRIATE CLIPART/IMAGERY.**

1. List the hardware and software requirements for the Shotspotter Flex system
2. As we have discussed in class, a computer accepts input, processes data, stores information, and produces output. Based on your review of Shotspotter, identify the input, data processing, storage, and output aspects of the Shotspotter system. The image below may be used for reference. Be sure to also reference the course lectures in Module one.

3. Using online news sources (NOT the Shotspotter site), find at least three cities where Shotspotter is being used. Summarize each city's experiences before and after employing Shotspotter. Be sure to list the URL (web addresses) of the news sources.
4. Imagine you are an advisor to a Chief of Police in a jurisdiction that is experiencing an increase in gun violence. Would you recommend Shotspotter? Explain why or why not.

Project Format:

1. 12 point font, double spaced
2. Full sentences, college level essays
3. Two pages minimum, three pages maximum excluding the cover page
4. Cover page must include title, course number and section, student's name, and appropriate clipart or imagery. Students are encouraged to experiment with Wordart and desktop publishing features on the coverpage.
5. Spelling and grammatical errors corrected.

Grading Rubric

Cover page with required information	10
Hardware and Software Requirements	20
Explanation of Input, Processing, Storage, and Output	20
Three examples on the use of Shotspotter	20
Shotspotter Recommendation	20
Spelling and Grammar	10
TOTAL	100
