

Instructions: You are required to answer the following questions. You should save your answers in a Word document for submission. Please do not repeat the questions on your answer sheet. Instead, please list the answers numerically/sequentially by simply utilizing 1, 2, 3, and 4. Each assignment must have a cover page listing your name, the name of the assignment, and the date. The cover page does not count towards the word count. For each assignment, you are expected to answer the assigned questions in your own words. **Each assignment paper should be at least 250 words. Papers less than the required 250 words will get zero.** This does not mean each question requires a 250-word response; rather, the total number of words for answering the questions must total more than 250 words.

- 1. Why have nonalcoholic drinks increased in popularity, and what difficulties do bar managers face when serving alcohol?**
- 2. Describe the origin of cocktails. What constitutes a cocktail?**
