

For this week's readings you are to write a 2 page response answering the following questions (in essay APA format) while incorporating this week's readings. I am also incorporating a short video (documentary) that allows you to hear directly from children that are in the foster care system. Their emotions, experiences, what they gained being adopted, their view of their adoptive family and the impact it has had on their life. There are things that we may not even consider that one in the foster care system would go through and they share their feelings.

https://www.youtube.com/watch?v=Jie__iO44fs

From the video which story stood out to you the most? Please explain.

1. From the video, what most important to the children?
2. From the video what were the things that the foster care system did not prepare them for?
3. Name the different types of non-relative foster homes? Which of these do you believe our society needs more of?
