Community medical nurses assume a vast part in keeping up healthcare for patients as they change from acute to outpatient settings. Community health nurses utilize innovation to keep up congruity of care. Group organizations are basic to enhancing and keeping up solid groups. Community partnerships ought to encourage the improvement of associations inside the group. These organizations are imperative in the achievement of shared wellbeing results.

Underlying Principles

Physical data

- Blood pressure
- Weight
- Blood oxygenation
- Blood glucose
- Heart rate
- Temperature
- ECG results

Audio data

- Voice conversation
- Heart sounds
- Lung sounds

Visual data

- Bowel sounds
- Wound images
- Surgical incision images

Nursing Interventions

WHO? WHEN? WHY? HOW?

- Electronic records, databases, and billing
- Internet availability of health information and education
- Electronic meetings and chat rooms
- Asynchronous discussions
- Web-based support groups
- Electronic orientation/training
- Health care access in rural areas
