Definition: it is the inflammation of the organ behind lower parts of the stomach known as pancreas.

Prevention: dietary changes including eating grains and fresh fruits and vegetables, avoiding fatty foods or fried foods, and avoid smoking

types: Acute pancreatitis and chronic pancreatitis

Underlying Principles

Gallstones is likely to occur which is a hardened deposit within the gallbladder fluid.

The condition manifest with nausea and vomiting and pain on the upper abdomen.

The risk can be managed through hospitalization and doctors treating the underlying cause

Nursing Interventions

WHO? WHEN? WHY? HOW?

- Maintaining nasogastric tube for drainage or suctioning
- Restricting the patient to bed rest
- Providing I.V. Fluids and parenteral nutrition as required
- Monitoring fluid and electrolyte balance
- Emphasizing the importance of diet especially those rich in carbohydrates and low in fats
