

Instructions for how to Complete the Project:

- If you want to make edits directly on the document so you can save it online and follow these instructions:
 - Click on “File” in the top left corner of the page.
 - Click on “Make a copy...”
 - A box will pop up with the name of the file (you can change it to whatever you would like to name it).
 - Click “OK”
 - You have your own copy now!
- If you want a Google account to save everything, we really recommend it. It automatically saves everything you do without having to actually click a button to save it. You can access it from anywhere including your phone or any computer you go to.
- You MUST provide proof of every part of the project. There is a proof checklist you can use to ensure you are providing proof of everything.
 - Without proof for each section of the project, you will lose 10 points.
 - We will not grade anything without proof.
- You will choose a career and corresponding salary for this project. You are 26 for the project so your career must reasonably fit someone that is of that age and education/training possibility.
 - In order to find your salary estimate, go to www.bls.gov where you will look up salary estimates.
 - In the “Search” box, type salary estimate.
 - You will see links pop up for “May 2019 National Occupational Employment and Wage Estimates United States”
 - Rules:
 - Your possible salary range cannot exceed \$90,000 per year. When you look up your career, you must choose the lowest available salary for that particular job.
 - You will need to pick a career that is reasonable for your age and education level.
 - Your career and salary must be approved by your teacher in order to continue with the rest of your project.
- You will put the information for each section of the project in a Google Slides or Powerpoint presentation. The proof for each section will be included with each slide. You can either put the proof directly on the slide or you can put it on the slide right after the section.
