

Coursework 1: Game Website

1. Summary

Version: 1.0

Individual project

Weighting: 50% of overall mark

Deadline for project proposal: 17:00 Friday 18th October 2019 (end of Week 3)

Deadline for website with navigation: 17:00 Friday 8th November 2019 (end of Week 6)

Deadline for final submission: 17:00 Friday 13th December 2019 (end of Week 11)

Deadline for demonstration: 17:00 on Friday 17th January 2020 (end of Week 13)

2. Key Points

- Website that enables the user to play a game.
- The user plays the game alone or against the computer.
- If the user plays against the computer, there are no extra marks for sophisticated artificial intelligence: simple random choices are fine.
- The website must be implemented in HTML, CSS, JavaScript and PHP.
- Zero marks will be awarded for a game that is copied from the Internet.
- Users can register with the website and login.
- The website has a page that displays the top scores of all registered users.
- User data and scores are stored in JSON format using HTML local storage.
- Cross-browser compatibility is not required – you only need to demonstrate your game on a single browser.
- PHP functions are used to output navigation menus, footers, etc.
- You are welcome to use third party libraries, such as jQuery, Bootstrap or a JavaScript game engine. You should check with the module leader if a third party library is used for a substantial amount of the functionality of your website.
- Marks are available for code quality, game quality and the attractiveness and usability of the website.
- The final submission of your project will only receive a mark if it has been demonstrated to your laboratory tutor before the end of Week 13.

3. What Needs to be Submitted:

Project Proposal (Deadline: 17:00 Friday 18th October 2019)

A short document that:

- Briefly describes the proposed game.
- Includes wireframe sketches of the website or screenshots of early prototypes.

We will use the project proposal to give you feedback about your idea and help you realize it in the time available. You can reuse material from the project proposal in the final project submission.

Submit Word or PDF version of project proposal using link on course website.

The project proposal will be marked online. It is worth 10% of the mark for Coursework 1.

Website with Navigation (Deadline: 17:00 Friday 8th November 2019)

You should submit your website with all of the pages and navigation working. The navigation and footer should be outputted using PHP functions. The JavaScript functionality for the game, top scores and user accounts is not required at this stage.

This website will be marked for attractiveness, usability and HTML, CSS and PHP code quality.

Submit:

1. A Zip file containing all the code.
2. A document containing screenshots of all of the pages of the website.

Upload the files using the links in the Coursework 1 section of the course website.

The website with navigation is worth 35% of the mark for Coursework 1.

Final Submission (Deadline: 17:00 Friday 13th December 2019)

Submit:

1. A Zip file containing the code
2. A project report that describes the website and any issues that you had with its development. This should be a Word or PDF document.

Upload these files using the links in the Coursework 1 section of the course website.

The final submission is worth 55% of the mark for Coursework 1.

4. Formative Feedback

Formative assessments do not directly contribute to the overall module mark but they do provide an important opportunity to receive feedback on your learning. They provide an opportunity to evaluate and reflect on your understanding of what you have learnt. They also help your tutors identify what further support and guidance can be given to improve your grade.

We are happy to give you formative feedback about Coursework 1 in the labs and can also give formative feedback about drafts of Coursework 1 that are sent to us more than 1 week prior to the deadlines.

5. Late Submission

We are very unlikely to give extensions to coursework and very unlikely to accept excuses. So we strongly recommend that you hand coursework in on time.

Contact the module leader before the deadline if you run into problems. **Unless he or she has given you permission for late submission, the marks available for coursework will halve every 24 hours after the deadline and will be zero after 1 week.**

6. Extenuating Circumstances

If you have personal problems that interfere with your studies, you can apply for extra time to complete coursework without a mark penalty. You have to provide appropriate documentary evidence.

More information here: <https://unihub.mdx.ac.uk/your-study/assessment-and-regulations/extenuating-circumstances>.

You must let the module leader know if you have been granted an extension.

7. Plagiarism

Plagiarism is a serious academic offence. Students that submit identical projects will be reported to the university. If they are found guilty, they will have to resubmit their work, their marks could be capped or they could fail the module.

We recognize that there is often a blurry line between copying and collaboration. People work together and help each other to solve problems and apply the solutions to their own projects. We strongly encourage this kind of collaboration. But it is not acceptable for students to collaborate on a project which they submit as individual work. To penalize this, the mark for near-identical projects will be divided between the projects. So suppose a project gets a mark of 60% and near-identical versions are handed in by 3 people. Each person will get 20%, instead of 60%. This only applies to the marks for the parts of the project that are nearly identical.

We are not going to police this and make detailed investigations. So if you allow your project to be copied, you will be as liable for plagiarism as the person who submits it as their own work. Both the original and the copy will receive zero or reduced marks.

8. Assessment Methods

Project Proposal

We will read your project proposal and give you feedback online and in the labs.

Website with Navigation

We will look at the code and view the screenshots that you have provided. The front end of the website will be marked after this submission. You can change your front end, but no further marks will be available for it after this date. The rest of the project will be marked after the final submission date.

Final Submission

We will look at the code, read your report and view a short demonstration of your project in the laboratory sessions. You must demonstrate the submitted code, not an improved version that you have worked on after the final submission date. **Your final submission will receive zero marks if you have not demonstrated it before 17:00 on Friday 17th January 2020.**

The project will be given a mark out of 100. This will be scaled down to a mark between 0 and 50 that corresponds to 50% of the overall mark for the module.

9. Assessment Criteria

Feature	Deadline	Marks
Project proposal. A short description of the website that includes wireframes of the design or screenshots of an early prototype. Do not include screenshots of code, the command line or Dreamweaver, NetBeans, etc.	17:00 18/10/19	3 marks. Description of the design of the website and how the game is played. 3 marks. Wireframes or screenshots of website pages. 4 marks. Proposal quality. Is it clearly written? Do the wireframes clearly show the website design?
Website. Navigation bar and place holders for the game, registration, login and rankings functionality.	17:00 8/11/19	5 marks. Multiple pages and navigation bar. 10 marks. Attractiveness and usability. Are the pages well designed and attractive? Has thought been given to usability?
PHP. PHP functions should be used to generate parts of the website dynamically. You must use PHP <i>functions</i>. No marks are available for using <i>include</i> to add blocks of HTML to the page.	17:00 8/11/19	10 marks. Use of PHP functions to generate parts of the website dynamically. These marks can also be awarded for other uses of PHP on the website, as long as it is not data storage.
HTML, CSS and PHP code quality. Your code should be well commented, tidy and easy to read. Files should be sensibly organized into folders. Marks will be deducted for unused files and commented out code.	17:00 8/11/19	2 marks. HTML code quality. 2 marks. CSS code quality. 2 marks. PHP code quality. 2 marks. File organization.
Screenshots of website pages. Paste the screenshots into a Word document. There is no need to provide any text.	17:00 8/11/19	2 marks. Document containing screenshot(s) of all of the website's page(s). In the case of a single page website, provide screenshots of key functionality.
Game. Must be implemented in HTML, CSS and JavaScript. Zero marks will be awarded for a game that is copied from the Internet.	17:00 13/12/19	5 marks. The website has a basic game that the user can play and obtain a score. Some marks can be awarded for a partially functioning game. 10 marks. These marks are for games that have complex JavaScript, sophisticated JavaScript (for example, use of classes) and a substantial amount of JavaScript. For example, graphics, multiple skill levels, etc.

User accounts. User can create an account and login. User data is stored in JSON format using HTML local storage. No marks will be given for storage in files or server-side storage with PHP, MySQL, MongoDB, etc.	17:00 13/12/19	5 marks. Storage of basic data in JSON format, such as name and email address. 5 marks Storage of additional data from the user in JSON format, for example address and phone number. 6 marks. Validation of user data. Some of this validation has to be done using JavaScript – a maximum of 3 marks is available for HTML validation. 5 marks. Login with appropriate error messages when details are missing, password incorrect, etc.
Ranking table of user scores. Users' scores are stored in JSON format using HTML local storage. The website has a rankings page that displays the top scores of all the users. No marks will be given for server-side storage with PHP, MySQL, MongoDB, etc.	17:00 13/12/19	5 marks. Storage of users' scores in JSON format using HTML local storage. 5 marks. Rankings page that lists the top scores of all the users.
JavaScript code quality. Your code should be well commented, tidy and easy to read. Files should be sensibly organized into folders. Marks will be deducted for unused files and commented out code.	17:00 13/12/19	3 marks. JavaScript code quality.
Project report. Briefly describes the project. This can reuse material from the project proposal. Do not include screenshots of code, the command line or Dreamweaver, NetBeans, etc.	17:00 13/12/19	2 marks. Screenshot(s) of all of the website's page(s). For example, game play, registration, login, and rankings table. 4 marks. Content of report. Does it clearly describe the project? You should describe how the game works and the registration, login, error handling, input validation and rankings functionality.
