Literature Review

Topics we will tackle

History of coastal erosion

Political Impacts

Restoration Plans

Purpose and Objectives

The purpose of this study was to examine coastal erosion in Louisiana.

1. Define coastal erosion.
2. Identify problematic areas on the Gulf Coast.
3. Describe methods of mitigating coastal erosion.

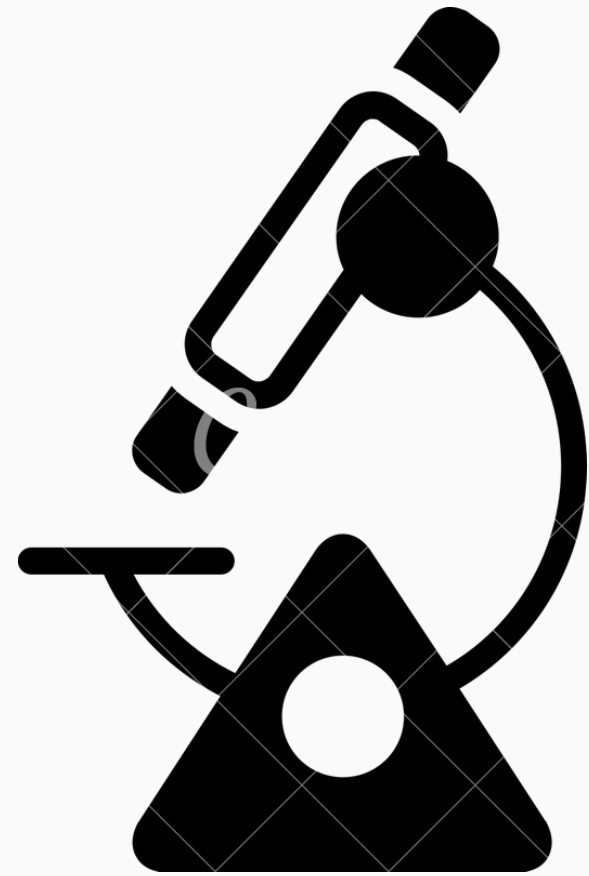

Discussion & Implications

- Coastal erosion is the lose or displacement of sediment due to water.
 - Louisiana is the home of the Mississippi River Delta.
- Problem Areas:
 - South Louisiana with growing oil, fishing, and shipping industry
 - Levee system
- There is not specific way to fix it.
