

Topic: Discuss the relationship between leadership and motivation. How does leadership impact motivation? How does motivation impact leadership? Does positive leadership always lead to positive motivation? Why or why not? Can effective leaders be poor motivators?

Instructions:

1. Do not treat the topic as a list of questions to be answered. Instead, treat the questions in the topic as suggestions about how you might approach the topic. Treat this as an essay.

2. A minimum response is 250 words.

3. Use two or more scholarly resources outside of your text. While you should cite the text when you use it as part of your response, the text alone is insufficient to support your response.*

*Note: Scholarly resources are peer-reviewed and are easily accessible through our online library. They do **not** include Wikipedia, wiki*anything, about.com, answers.com, or any other generic answer base, because we cannot provide the veridicality of the information on similar websites. Simply citing something from an unknown website is not graduate level work.

4. All in-text citations and references must be in APA format.

5. You must respond to at least one other student in their discussion threads. I suggest that you ask questions and refer to specific portions of the response toward articulating important points.
