

For this week's discussion, we're asking you to find an **outside resource** that you can utilize this semester. This resource will help you analyze and research topics and specific projects. For example, a website like *archdaily* that posts articles about significant architectural works will be helpful when researching prominent projects.

Browse the listed resources below and select one that you find interesting. Once you have found your resource, find an article, podcast, or post that grabs your attention. It can be anything related to architecture and design (*this could be as bizarre as the fish canon podcast from 99% Invisible*). Once you've made your selection, tell us about it! Summarize your article, podcast, or post in 150 words (minimum) or more.

Once you've told us about your interesting piece, read some of your peers interesting posts and respond to two of them with a minimum of 50 words.

Get excited! Get talking!
