

Global material market trend report

In this assignment, students are requested to summarise the **market trend of construction materials**. Choose five materials (e.g. steel, cement, bricks, timber, concrete etc.) , make a diagram for each materials' 10 years trend with analytical comments on the trend (150 words per material). Research on the backgrounds of trend and future prospects are also expected.

Words: 150 words + 1 diagram per material (750 words + 5 diagram in total) + reference list

Expectations

A written report structured professionally is required to be submitted via Canvas. **You are expected not to exceed the word limit by 10%**. A clear analysis and a rational discussion with the references under the **Havard Referencing Style** are also expected. Please use appropriate headings and/or subheadings to guide present and your analysis and relevant discussions.
