

Project Title

Student Name

Topic

- What is your topic?
- Who is your priority population?
- Describe your priority population using public health lens.
- What health behaviors are associated with your topic?
- What health policies are associated with your topic?

Scope, Morbidity, and Mortality

- Scope
 - How many people in your population are impacted by this issue?
 - What percentage?
 - In what ways is your population disproportionately impacted?
- Morbidity
 - What is the disease, illness, or symptoms associated with your health condition?
 - How many exhibit morbidity? What percentage?
- Mortality
 - How many people die from this?
 - What percentage?

Best Solution

- Explain the **root causes** of the health issue.
- If you had a Public Health Magic Wand, that gave you all the money in the world, and all the power to implement change for this root cause, how would you reduce morbidity and mortality from this health issue?
- Include examples at the personal, community, and policy level.

Practical Solution based on Research

- Find at least one evidenced-based intervention that has successfully reduced morbidity and mortality for your health issue.
- Explain how the intervention works.
- This slide requires a peer-reviewed literature citation!

Implement and advocate

- What can an individual do to protect/prevent this health issue from negatively impacting their lives?
- What group or organizations, if any, are advocating for improvement on this health issue?
- What can an individual do to help advocate?

Resources

- If I am a person with this issue, where can I go to get help/information?
- If I am a person supporting someone with this issue, where can I go to get help/information?
- List at least one resource for each.

References

Include:

- At LEAST 5 references
- 1 must be a peer reviewed research article from an academic journal.
- Acceptable references are discussed in the syllabus!
- References do not need to be formatted, but the URL must work and/or must be a PERMALINK.
- Zero credit for dead links.

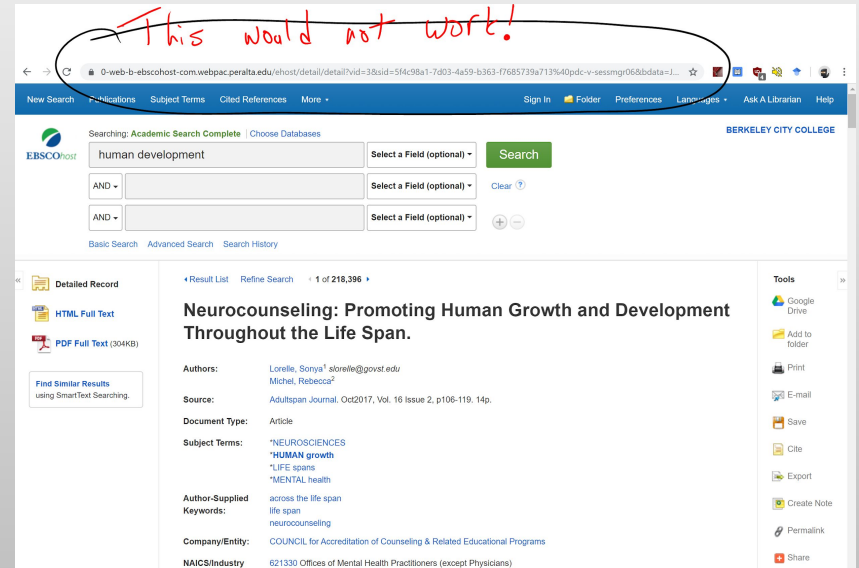

How-to find/create a permalink

Hyperlink Explanation

In case you're confused, if you use a database you can't just copy and paste the link from the address bar, but you need to find the permalink to the article. For example:

The above link is copied from the address bar and does not work.
