

How to wall mount a TV.

After purchasing a new flat-screen TV, the biggest challenge is mounting the TV now on to a wall. Any mistake in mounting it could lead to damage to the new TV. Although it comes with an instruction manual on how to go about initialization and mounting, many people still find it challenging to complete the task. There is an essential tool in drilling the holes where it is to be mounted, but the measurements have to be exact and precise to ensure the wall is not destroyed. Mark and drill the pilot holes. The next step is attaching the mounting bracket to the wall and the plate on the TV. Mount your TV to the wall now and enjoy watching, safely, and securely.
