

Sociology 409

Increment 4

Literature Review, 25 points possible

- In the literature review, you will explore the topic of your paper in further detail. The goal is to provide the reader with a rich *sociological* understanding of the topic at hand. 25 points are possible for this increment of the paper. Please remember that this is a sociology paper.

Elements of the Literature Review and Grading Criteria

- Exploration of the two main themes: Explore the two main themes that arose as you created your annotated bibliography. The themes should be sociological, rather than biological or medical. This may entail finding additional sources to provide a rich discussion of each theme. It is anticipated that you will spend at least one and a half pages, and perhaps longer, exploring each theme.
 - Use a subheading to denote each theme.
 - Up to 10 points can be earned for this section.
 - Please integrate at least eight references (many of these will be from your annotated bibliography into the discussion of these themes).
- Application of course concepts: Apply at least 3 course concepts to your topic. For each, you will explain the concept, and then you will explain how this concept connects to your topic.
 - Use a subheading to denote this section of your paper.
 - Up to 5 points can be earned for this section.

Please select from the following concepts:

- Mind-body dualism
- Internalization of social control
- Biopower
- Docile bodies
- Disciplinary gaze
- Embodiment
- Bodily conduct
- Bodily betrayals
- Body work
- Face work
- The body as a sign vehicle
- Impression management
- Expressions given, expressions given off
- Body idiom
- Virtual social identity, actual social identity
- Stigma
- Physical capital
- Feeling rules
- Surface acting, deep acting
- Somatic work

- o Gender panic
 - o Doing gender
 - o Body image
 - o Edgework
 - o Stratified reproduction
 - o Reproductive justice
 - o Reproductive governance
- References: You should have a list of references formatted according to APA guidelines. In-text citations should also follow APA guidelines. The following website contains highly useful directions about formatting using APA style.
