

Interview Paper Prompt

Due: 3/26 before midnight

Please utilize the writing center by setting an appointment with a tutor if you need further assistance in writing APA style.

Based on this assignment you must create a set of interview questions to ask your participant.

What questions you will ask your participant will be based on your chosen topic. **Pick any section from the book and any social justice issue, then find a participant (whom you know) that is willing to provide their perspectives, experiences, and knowledge on the issue.**

For example, you may choose the topic of LGBT and hate crime, then find a friend who identifies as an LGBT member to ask them questions regarding the issue.

This paper must be **5 – 8 pages**, double-spaced, and **MUST** include the set of interview questions as an appendix after your reference page. Title page, reference page and appendix does not count towards page limit.

Be sure to stay empirical and objective in the issue and use theories, models, and concepts from your book to the paper. You may use additional research if necessary, but please do not plagiarize.

You must:

- Describe your interviewee (how you know them, length of relationship, etc.).
- Describe your chosen topic of social justice issue. Be thorough and describe objectively.
- Describe overall responses (summarize what you got out of them). Sparingly use direct quotes from the interview session, I do **not** want a script of what they said verbatim. You should synthesize, evaluate and think back on the readings and concepts discussed in class as they manifest themselves outside of class, and how it affects someone in real life.
- Define 1 – 2 relevant theory/model/concepts to one or more of your interviewee's answers!
- Conclude with connecting the interview session to the book and/or any other research article related to your topic. Highlight on your experience as the interviewer, describe what you learned from this interview.
- APA style citation and reference page required, please include your interview questions as an Appendix **after** the reference page.
