

## **Job Research:**

You need to answer the following questions about your job you've chosen:

1. Why did you choose that particular job?
  2. What qualifications, education, and/or background do you need for this career?
  3. What is the success rate of getting and maintaining a job in this field? (In other words, what is the unemployment percentage for this job?)
  4. What do you perceive the working environment to be like? (you may have answers to each one of these sections, or your job may not apply to some of these)
    - a. Job location
    - b. Job pressures
    - c. Responsibilities
    - d. Co-workers
    - e. Indoor vs. Outdoor
- You will put your answers to each of these questions in your presentation (Google Slides or Powerpoint).
  - Make each question a slide.
