

This is a MUST-DO assignment, as your future assignments will be based on the topic you chose here. You may do this on paper and scan it to submit. That is fine.

For this assignment, choose one of the following topics:

- Education/Role of Education/Accessibility
- Language/Literacy/Texting/
- Food/Food Production/Availability
- Identity/Self
- Work/Income/Wages/Pay Gap

Set a timer for ten minutes. During this five minutes, write down as many thoughts and ideas about this topic as you can. Keep writing, no matter how bizarre or seemingly unrelated the thoughts or ideas are. Just keep writing. When the timer is up, stop.

Now, for the next ten minutes, using the Clustering Method described on page 83 of your textbook, make a clustering model of your list.

After you have clustered your ideas together by what is linked, what is sorta connected and what is not related, write a dummy thesis using this clustermap.

This paper is about _____ and how _____.

Submit all of it here.
