

Lab #5

Writing for the Web

1. Paraphrase six tips that you find important about writing for the web from the Nielsen Norman Group on the [topic of Usability](#). Starting with the link provided navigate the site to identify tips that you think would be useful either your analysis short writing assignment or the final group report.

Recommended Timing
(30-45 minutes)

1. Provide a copy of the instructions for how to create a usability study that you and your group have constructed. In a few short sentences I want you to personally reflect on which steps in these instructions will be the most difficult? Which steps in the instructions are the most difficult to understand? Which are the easiest? In either case why?

Tips:

Use this lab as an opportunity to start planning your group work if you haven't started already!

Recommended Timing
(30-45 minutes)

Submission Guidelines
