

MGT 402 Independent Study

Article Review Format*

1. Title & Authors – Use APA format to reference the article.
2. Abstract/Introduction – Copy the abstract or summarize the introduction.
3. Research Purpose – What is the purpose of this research?
4. Research Question(s) – Which questions is this research attempting to answer?
5. Hypotheses – What are the hypotheses that this research is testing?
6. Methodology – How were the hypotheses tested?
 - a. Sample size (i.e., participants, population, etc.)
 - b. Sample's demographics and characteristics (i.e., gender, age, race/ethnicity, classification, local/global, etc.)
 - c. Measures/Instruments (e.g., surveys, questionnaire, response rate, etc.)
 - d. Research method (e.g., regression analysis, structural equation modeling, etc.)
7. Results/Findings – Was each hypothesis supported (proved) or not supported (disproved)? Summarize this information.
8. Discussion/Conclusions – Summarize this information.
9. Implications – Summarize this information.

**Note: Business articles will not have all of these review items. Gather as much of this information as possible.*
