Global Comparative Health Lecture

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

HPHA 5305 – Principles of Management & Leadership in Healthcare

Definition of Health

World Health Organization (WHO) Constitution (1948):

"Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity."

World Health Organization

Constitution of the World Health Organization

The Constitution was adopted by the International Health Conference in New York from 19 June to 22 July 1948, signed on 22 July 1948 by the representatives of 61 States and entered into force on 7 April 1949. Later amendments are incorporated into this text.

Macro-level Parts of Systems of Health (cont.)

Population (Public) Health Systems

- Surveillance and monitoring of the population
- Investigations of death, disability, and sources of disease (communicable & noncommunicable)
- Disease mitigation through preventive or control measures

Personal Health Systems

- Healthcare delivery – organizing & arranging resources
- Developing healthcare resources – human, technical, fiscal, political
- Evaluating the quality & effectiveness of care

Find & Szeles JM World Health Systems: Challenges and Perspectives. Chicago, IL: Health Administration Press; 2017.

Personal Health System Building Blocks

- **Service Delivery** – safe, quality, & effective care
- **Health Workforce** – competent, sufficient & productive
- **Health Information** – timely information on health system performance
- **Medical Technology** – scientifically sound products, drugs, & technology
- **Health Financing** – raises funds to ensure service provision & coverage
- **Leader & Governance** – effective oversight, regulation, system design & accountability
