

Final Project Assignment Sheet - Website

For your final project, you will create a website for an organization, a business, or a cause that is important to you. In order to do this effectively, you will need to incorporate all of the information we've learned and practiced over the semester and practices of good web design (page 281).

You may use any web design tool you'd like (www.weebly.com is a good one, though).

The final product of this should be a single website that contains **at least** five separate pages with enough text to fill at least 5 double-spaced pages of a single word document. This must also be accompanied by a three-page discussion of the methodology you used in creating your website.
