

Each student will look for a news event to share with the class. The news event must be on one of this week's topics: Zika, West Nile Virus, Dengue, or Chikungunya. The news story must be within the last year (i.e., no earlier than November 1, 2017). You may choose any topic related to this week's discussion that you wish.

During class, on your assigned day, you will present to the class your news story. You will need to provide:

- The name of the news source
- The date of the news
- The author of the news story
- The “who, what, where, when, why, and how” (5 W's and H) of the news article
- The impact of this news story on public health

Appropriate news sources include any newspaper, scientific magazine, or news Internet site. For example:

- ✓ USA Today
- ✓ CNN News
- ✓ The Washington Post
- ✓ Time Magazine
- ✓ U.S. News & World Report Scientific America

Sources that are NOT appropriate for this assignment include, but are not limited to:

- ✓ Centers for Disease Control and Prevention (CDC)
- ✓ World Health Organization (WHO)
- ✓ Mayo Clinic
- ✓ Yahoo
- ✓ People magazine
- ✓ Other government organizations that provide facts and statistics

This must be a NEWS story and you must be able to explain the 5 “W’s” and “H” of the story. Everyone must submit a copy of the news story v

You will submit a copy of your article via this tab. DO NOT submit a URL. You must submit a JPEG or PDF of the article that includes the name of the source, the author, and the year.
