Informative Essay Outline Template

I. Introduction

- a. Hook: The coronavirus pandemic has shaken the world and the education system; however, technological advancement has also paved the way for many institutions.
- b. Thesis statement: In-person learning can be used during the 2021-2022 school year in K-12 students because it fosters equality in education; studies have shown 94% of parents and women have a negative experience in online learning and in-person increases social interaction among students; however, online learning also was adopted during the pandemic to ensure education continues since it was first implemented in 1991, encourages varied social interactions among scholars and schools to work to ensure required technologies are available to improve the learning experience.

II. Body Paragraph 1

- a. Topic Sentence: The United States should use it in-person to teach K-12 students during the 2021-2022 school year.
 - i. Supporting detail 1: In-person learning enhances equality in the education system because all students will attend the class physically regardless of their economic status, limiting their access to computers and the internet.
 - ii. Supporting detail 2: Parents and teachers involved in the study stated a negative experience on the use of online learning in K-12 students.
"ninety-four percent of the participants stated the problems faced online and the experience was negative" (Tueros, 2021).

- iii. Supporting detail 3: In-person learning increases students' social interaction, hence improving their interactions, psychological and physiological needs. "Distance learning does not provide the same degree of socialization as in-person learning and results in increased education gaps" (Matter, n.d).

III. Body Paragraph 2

- a. Topic Sentence: The United States should not use in-person to teach K-12 students during the 2021-2022 school year.
 - i. Supporting detail 1: In-person learning was suspended during the coronavirus pandemic, and online learning was adopted to continue education. Therefore, it is vital for it to be continued and safeguards students' health and well-being, and counter the spread of the pandemic because personalized learning will be encouraged. K-12 schools introduced distance learning early in 1991 by a private institution called Laurell Spring school; this makes it an existing practice in the schools (Barbour, 2018).
 - ii. Supporting detail 2: Online learning encourages varied social interactions because intellectuals can apply the lessons outside the classroom. Increased road trips result in more social participation making learners interact with different people and socialize. "Distance learning may permit education enhancement including high-quality learning chances, increased students' motivation and improvement in learner's outcome" (Barbour, 2018).

- iii. Supporting detail 3: Although the institutions need to ensure all the required technologies are available, they can also improve student's experience. "Online learning has several challenges, but the implementation will assist schools in comprehending learner's difficulties and enhance their experience" (Yan et al., 2021).

IV. Conclusion

- a. Transition: Although in-person learning ensures equality in education, fosters social interaction, and parents have stated negative concerns about online learning, at the same time, distance learning encourages varied social interaction, personalized learning, and schools are working to improve students experience on it because of high flexibility the learning method offers.
- b. Restatement of thesis: In-person learning can be used during the 2021-2022 school year in K-12 students because it fosters equality in education; studies have shown 94% of parents and women have a negative experience in online learning and person increases social interaction among students; however, online learning also was adopted during the pandemic to ensure education continues since it was first implemented in 1991, encourages varied social interactions among scholars and schools to work to ensure required technologies are available to improve the learning experience.
