

Climate Change

Write a one-page report describing how some key aspect of the Health Science pathway will change due to climate change in the coming decades. Be sure to clearly cite all references and sources used. Please post a short (one paragraph) summary of your report in the class discussion forum. Comment on the post of another (compliments, statements of agreement, etc. that do not otherwise add to the subject of the discussion will not count).

Your grade will be determined as follows:

I) Report clearly identifies how climate change will impact a key area of the Health Science pathway in coming decades. Report is one page in length. References are given. (0 – 5 points)

II) Summary of report is posted in in course forum. Feedback is provided to others for their posts. (0 – 5 points)

Brief description of change that is or will be caused by climate change:
