

Demographic information (complete)**Sample size:**

There were 244 participants included in the majority of the data analyses (four additional participants were discarded for either entering nonsensical, obviously obnoxious (not serious) responses, or not responding to portions of the questionnaire; no respondents were removed due to being underage).

Age:

Mean = 30.77

SD = 14.55

Range = 18 – 80

Note: six participants did not report their age

Biological sex/Sex assigned at birth (SAAB):

163 females (66.80%)

81 males (33.20%)

0 reported “other” (0%)

Gender identity:

149 women (61.07%)

79 men (32.38%)

15 reported “other” (6.15%)

One did not report their gender identity (0.41%)

Ethnicity:

174 non-Hispanic White/Caucasian (71.31%)

6 Black/African American (2.46%)

19 Hispanic/Latinx (7.79%)

22 Asian/Pacific Islander (9.02%)

4 Native American (1.64%)

7 Middle eastern or North African (2.87%)

9 biracial/multiracial (3.69%)

3 “other” (1.23%)

This is the complete set of demographic data.

It should be used to complete the Participants subsection of your Method section for the project.

You will present each of these categories, as illustrated in the SampleMethod section provided in Canvas.
