

Program Implementation Plan (programs should be interactive and 30-60 minutes in length)

Please respond to the following. Leave in this format

Student Names:
Site name: 14th& chestnut community center Site contact information: (Heather Slee +1(812)232-3126)
Health Issue: (provide a 2-3 sentence summary of the scope of the health issue) My program will focus on kids but especially with all kids who suffering from nervousness, because when they color and drawing they will have less stress and use all there energy on drawing and playing with other kids.
Target audience: (how many people, age, gender etc.) kids age from 5 to 8 years 10 boy and 10 girl I'm think about maximum of 20 kids
Marketing: (brief description of how you will market the program/event and why you chose this strategy) i.e. chalk the sidewalks, social media, signage (location) printing a flyer and put it in Kroger, in the 14th chestnut community center office ,and some school like Terre Haute Christian School.
Program description: (use bullet points to summarize key activities and timeline) The program we will offer it to the kids age from 5 to 8 which is about color and fun which give times for kids to have fun and joy. it will be a great time to spending time drawing and coloring with kids
Objectives: (list at least two well-written objectives for your program) • By the end of the program the percipients will be able to identify basic colors. • By the end of the program the percipients will be helped reinforce concepts related to colors and all kids will be able to know attest one name of the the color
Evaluation: (briefly describe how you would evaluate the success of your program) The measure of successful of this program is that 20 kids have attend the program and i see some hand up when i asked if they have fun.
