

### Proposal for oral History Report

For this project I am interviewing one of the friends Chloe, a Korean American girl whom I have met a couple years ago through mutual friends. She is one of the smartest people I know so far. We had a couple classes together last semester and she is a very nice person with a beautiful soul. I really do not know much about her besides she is an Korean adoptee. I will ask the following questions.

- Have you ever been to South Korea?
- Do you know your biological parents ?
- Have you ever tried to find your biological parents?
- If given the opportunity, would you ever fly to South Korea to meet with you biological parents?
- How old were you when you were adopted?
- Did you ever find yourself being bullied in school just because of the fact you were Korean?
- What type of stereotype people usually have towards Korean and Korean American in general?
- As a Korean American, who is also an adoptee how would you describe yourself? What do you think about your identity?
- Are you or someone you know has been directly affected by Korean war? If so how?
