English

Arabic

Dear Arab Anti-Discrimination Committee,

The past three years have been difficult as I have been advocating for Anti-Discrimination towards Arab-Americans however now that I am presented with an opportunity to advocate and apply my skills with others that share my passion. God willing, the repercussions of Sep,11 will soon end and Arabs viewed for their righteousness.

In one of my current projects, I have proposed to SFUSD's Board of Education that our educators in academics, and school curriculum should look at Arabs through the lenses of American studies, ethnic studies, sociology, political science, journalism, orientalism and by no means solely on 9/11.

I am also the founder of a fundraiser (Urgent Care For Yemen) that provides humanitarian aid to deprived neighborhoods in the city of Sanaa, Yemen. I've managed to employ a crew overseas who are in charge of distributions and documentation. With God's will, I was not only able to fundraise using social media, I also connected with Brother Livingstone, an admin of Ministries in India who helped fundraise for my campaign abroad. 15 water tanks were built and spread out in the city of Sanaa that are being refilled as needed by our crew.

In January of 2020 I was granted the opportunity to intern and work closely with Shamman Walton, San Francisco President of the Board of Supervisors, where I was introduced to areas in legislation, the press, and more.
