1 THEORETICAL DEVELOPMENT AND CONCEPTUAL FRAMEWORKS

NSG/416

Gulnoza Madrakhimova

Course: NSG 416

University of Phoenix 18th December 2021

Thesis statement: 1 THE THEORETICAL FOUNDATIONS OF NURSING CAN HELP INDIVIDUALS TO DO MORE COMPLETE WORK IN HANDLING THE DIFFERENT HEALTHCARE PATIENTS AND HELPING THEM RECOVER.

Introduction

Definitions

Reviewing Seizures

Forming a Testable Theory

Conclusion

Introduction

Understanding and studying science that is the human body influences Health care.

It remains important to understand how theories on different ailments are made and what can be done to effectively create better theories.

1 UNDERSTANDING THE INFLUENCING FACTORS CAN HELP A GOOD DIAGNOSIS EVEN WHEN THE INFORMATION PROVIDED BY A PATIENT IS NOT COMPLETE.

The theoretical foundations of nursing helps patients recover.

Health care remains to be one of the field much influenced by both the understanding and studying science that is the human body. Knowing what is happening and what is expected helps medical practitioners to respond in the best possible manner and help the patients with their recovery process. ¹ **IN THE CASE OF NURSES, IT IS EVEN MORE IMPORTANT TO UNDERSTAND HOW THEORIES ON DIFFERENT AILMENTS ARE MADE AND WHAT CAN BE DONE TO EFFECTIVELY CREATE BETTER THEORIES. UNDERSTANDING THE INFLUENCING FACTORS CAN HELP ONE ALSO TO MAKE A GOOD DIAGNOSIS EVEN WHEN THE INFORMATION PROVIDED BY A PATIENT IS NOT COMPLETE. THE THEORETICAL FOUNDATIONS OF NURSING CAN HELP INDIVIDUALS TO DO COMPLETE WORK IN HANDLING THE DIFFERENT HEALTHCARE PATIENTS AND HELPING THEM RECOVER.**

3

Definitions

A phenomena in is all that which we witness and feel using our senses. We consider a phenomenon when the patient falls down, when the dog barks among others.

Many things are known to happen and also known to relate to each other.

¹ **A CONCEPT, CAN BE DEFINED AS BEING AN IDEA OF SOMETHING.**

² **IT MAY BE AN UNDERSTANDING OF THE WAY SOMETHING IS AND HOW IT WORKS EVEN WHEN IT IS NOT FULLY PROVEN.**

A phenomena in is all that which we witness and feel using our senses. We consider a phenomenon when the patient falls down, when the dog barks among others. Phenomena can be considered a fact that can be seen or experienced but one that the explanation for its existence is not very clear (McKenna et.al 2008). Many things are known to happen and also known to relate to each other. However, the clear explanation behind the events is not always available, and this is called phenomena. ¹ **A CONCEPT, ON THE OTHER HAND, CAN BE**

DESCRIBED AS AN IDEA OF SOMETHING. ² IT MAY BE AN UNDERSTANDING OF THE WAY SOMETHING IS AND HOW IT WORKS EVEN WHEN IT IS NOT FULLY PROVEN.

4

Definitions

A proposition, can as well be described as a statement that attempts to explain the relationship between two concepts (Kemme, 2017).

A proposition remains essential because it is often based on some professional understanding that an individual may have and it can form the basis of making a full theory.

Assumption is always something that has been accepted as being real or true despite it having not been fully proven.

A proposition, can as well be described as a statement that attempts to explain the relationship between two concepts (Kemme, 2017). This is an important thing because it is often based on some professional understanding that an individual may have and it can form the basis of making a full theory. Lastly, an assumption is something that is accepted to be true even when it is not fully proven. Assumptions may need further proving before it can be considered to be the fact that all people can back with evidence.

5

Reviewing Seizures

A seizure can be defined as uncontrolled electrical disturbance in the brain.

leads patients to partially or fully lose control of their bodies and their actions.

When seizure occurs, The uncontrollable jerking movement of the body is also noticeable.

Temporary confusion and a spell are also notable.

I always encounter seizures phenomenon in clinical practice. ² **A SEIZURE IS A SUDDEN UNCONTROLLED ELECTRICAL DISTURBANCE IN THE BRAIN.** It often happens to patients from time to time, and it leads patients to partially or fully lose control of their bodies and their actions. The uncontrollable jerking movement of the body is also noticeable when a seizure occurs, and this is most notable for the legs and the hands. There is also notable temporary confusion and a spell where the individual stars into the open. There is also a notable loss of consciousness among the patients, and this can either be full loss or partial loss of consciousness.

6

Reviewing Seizures Cont.

Various motional symptoms such as anxiety and fear can be noted on the patient.

² **THE IDEA THAT EPILEPTIC PATIENTS ARE AT THE GREATEST RISK OF SEIZURES IS A RELATED CONCEPT.**

It is notable that seizures are largely associated with patients that are considered to be epileptic.

Ideas on seizures are as a direct result of epilepsy has stuck and is generally accepted across many healthcare facilities.

² **THE IDEA THAT EPILEPTIC PATIENTS ARE AT THE GREATEST RISK OF SEIZURES IS A RELATED CONCEPT.** It is notable that seizures are largely associated with patients that are considered to be epileptic. ² **THIS IS AN IMPORTANT FACTOR TO CONSIDER AS MANY CASES OVER THE YEARS BE HAPPENING AMONG EPILEPTIC PATIENTS (MARTIN, & NAHAR, 2017). THERE HAVE ALSO BEEN MANY HEALTHCARE FACILITIES THAT HAVE MADE IT A CONCEPT BECAUSE THEY HAVE MADE THE FIRST CAUSE OF TREATMENT FOR ANY SEIZURES TO BE LOOKING FOR EPILEPSY.** The idea that seizures are as a direct result of epilepsy has stuck and is generally accepted across many healthcare facilities. Many training sections of nursing also accept that patients that show these signs are likely to suffer from epilepsy, and nurses are trained to handle the problem as is occurs.

7

Reviewing Seizures Cont.

² **THE RELATED PROPOSITION IS THAT EPILEPSY IS RELATED TO SEIZURES IN SOME WAY.**

HELPS SET THE STAGE FOR AN UNDERSTANDING OF THE RELATIONSHIP BETWEEN EPILEPSY AND SEIZURES THAT PATIENTS EXPERIENCE.

Majority of people that suffer seizures have epilepsy.

2 THE RELATED PROPOSITION IS THAT EPILEPSY IS RELATED TO SEIZURES IN SOME WAY. THIS IS AN IMPORTANT PROPOSITION THAT HELPS SET THE STAGE FOR AN UNDERSTANDING OF THE RELATIONSHIP BETWEEN EPILEPSY AND SEIZURES THAT PATIENTS EXPERIENCE. THERE HAVE BEEN VERY MANY CASES IN THE PAST THAT HAVE ESTABLISHED THAT THE MAJORITY OF PEOPLE THAT SUFFER SEIZURES HAVE EPILEPSY.

The relationship between the two has been established as a result of many cases in healthcare facilities being solved as a result of diagnosing epilepsy among the patients that are affected.

8

Reviewing Seizures Cont.

if an individual suffers the seizures repeatedly, the most likely diseases that are affecting them is epilepsy.

There are also many types of seizures that people experience but the most common is is the one that is experienced by epileptic patients.

Over the years, it has also been established that if an individual suffers the seizures repeatedly, the most likely diseases that are affecting them is epilepsy. There are also many types of seizures that people experience, but the most common among individuals is the one that is experienced by epileptic patients. **2 THE PROPOSITION THAT EPILEPSY IS RELATED TO SEIZURES IN SOME WAY IS VERY ACCURATE AND CAN BE CONSIDERED TO BE RIGHT.**

9

Reviewing Seizures Cont.

2 UNDERLYING ASSUMPTION THAT EPILEPTIC PATIENTS DO NOT GET SEIZURES INTENTIONALLY.

that patients that are epileptic cannot control the seizures that they experience and that they are simply experiencing the effects of having the disease.

Lastly, there is an underlying assumption that epileptic patients do not get seizures intentionally. This is an assumption that is held to show that patients that are epileptic cannot control the seizures that they experience and that they are simply experiencing the effects of having the disease.

10

Reviewing Seizures Cont.

The assumption is that it is impossible to fake the seizures that people experience and that all those that experience them get them natural without any effort.

2 AS A RESULT, EPILEPSY AND THAT MOST PATIENTS THAT SUFFER SEIZURES ARE MOST LIKELY TO BE EPILEPTIC.

The assumption is that it is impossible to fake the seizures that people experience and that all those that experience them get them natural without any effort. It is also accepted in the nursing community that seizures come largely.

2 AS A RESULT, EPILEPSY AND THAT MOST PATIENTS THAT SUFFER SEIZURES ARE MOST LIKELY TO BE EPILEPTIC. THIS ASSUMPTION HAS CREATED THE BASIS ON WHICH THE THEORY BETWEEN EPILEPSY AND SEIZURES HAS DEVELOPED.

11

Forming a Testable Theory Cont.

2 BASED ON THE ANALYSIS OF BOTH CONCEPT, ASSUMPTION, PHENOMENON AND PREPOSITION, ONE CAN GENERAL CONCLUDE THAT SEIZURES ARE DIRECTLY RELATED TO EPILEPSY.

WHILE THERE ARE MANY DISEASES THAT CAN CAUSE INDIVIDUALS TO SUFFER A SEIZURE, IT HAS BEEN ACCEPTED GENERALLY THAT THE MAJORITY OF THE CASES CAN BE DIRECTLY TIED TO EPILEPSY.

BASED ON THE ANALYSIS OF THE FOUR TERMS WHICH ARE CONCEPT, ASSUMPTION, PHENOMENON AND PREPOSITION, ONE CAN GENERAL CONCLUDE THAT SEIZURES ARE DIRECTLY RELATED TO EPILEPSY. WHILE THERE ARE MANY DISEASES THAT CAN CAUSE INDIVIDUALS TO SUFFER A SEIZURE, IT HAS BEEN ACCEPTED GENERALLY THAT THE MAJORITY OF THE CASES CAN BE DIRECTLY TIED TO EPILEPSY.

12

Forming a Testable Theory

2 IT HAS BEEN NOTED AMONG CLINICAL OFFICERS IN MANY HEALTHCARE FACILITIES, AND IT HAS BECOME A GENERALLY ACCEPTED FACT (MILL, ALLEN, & MORROW, 2016).

largest types of seizures are caused as a result of epilepsy.

This also happens because in cases where the epilepsy is not treatable by medicine, then a surgical operation helps a person to recover and become even better.

2 THIS IS A FACT THAT HAS BEEN NOTED AMONG CLINICAL OFFICERS IN MANY HEALTHCARE FACILITIES, AND IT HAS BECOME A GENERALLY ACCEPTED FACT (MILL, ALLEN, & MORROW, 2016). There are also many types of seizures that individuals can suffer, but it is notable that the largest types of seizures are caused as a result of epilepsy. This also happens because in cases where the epilepsy is not treatable by medicine, then a surgical operation helps a person to recover and become even better.

13

Conclusion

1 THE THEORETICAL FOUNDATIONS OF NURSING CAN HELP INDIVIDUALS TO DO COMPLETE WORK IN HANDLING THE DIFFERENT HEALTHCARE PATIENTS AND HELPING THEM RECOVER.

² **IN THE CASE OF SEIZURES, ONE CAN FORM A THEORY THAT INDIVIDUALS SUFFER FROM SEIZURES ARE MOST LIKELY TO BE SUFFERING FROM EPILEPSY.**

it is possible to create the foundation of a theory that can be tested in the real world to be found to be true or not true.

² **WITH THE CONSIDERATION THAT WAS MADE ABOUT THE PHENOMENA, CONCEPT, PREPOSITION, AND ASSUMPTIONS, ONE CAN CONCLUSIVELY SAY THAT SEIZURES MOSTLY HAPPEN AS A RESULT OF EPILEPSY.**

¹ **THE THEORETICAL FOUNDATIONS OF NURSING CAN HELP INDIVIDUALS TO DO COMPLETE WORK IN HANDLING THE DIFFERENT HEALTHCARE PATIENTS AND HELPING THEM RECOVER.** ² **IN THE CASE OF SEIZURES, ONE CAN FORM A THEORY THAT INDIVIDUALS SUFFER FROM SEIZURES ARE MOST LIKELY TO BE SUFFERING FROM EPILEPSY.** Using the four items, it is possible to create the foundation of a theory that can be tested in the real world to be found to be true or not true. ² **WITH THE CONSIDERATION THAT WAS MADE ABOUT THE PHENOMENA, CONCEPT, PREPOSITION, AND ASSUMPTIONS, ONE CAN CONCLUSIVELY SAY THAT SEIZURES MOSTLY HAPPEN AS A RESULT OF EPILEPSY.**
