

The Science of Acoustics – McCaskey

Assignment #6

Due next week at the **beginning** of class. Please write out or type your answers, and hand them in then. No homework will be accepted after solutions are posted. Show your work!

The problems are in two places because some of class dealt with standing waves in pipes, which is something covered in a chapter we've already read a bit.

Do problems in the Chapter 6 notes #1-4, 6

Then review the notes on Chapter 4 (referenced in the slides) and do problems in that chapter #8 and 11-13. Problem #10 will look like a lab we'll do soon but it's not due this time.
