

1.

```
public static void main (String [] args)
private int findLargest (int x, int y, int z)
public static String fillWithZs (int num)
```

2. d

3. public static int average(int num1, int num2)

4. public static int mystery1(String str)

5. ilercom

6. 2.0

7.

9 27

6 3

8.

How many iterations?

0

0

0

9.

s = "world"

n = 6

10.

```
public static int reverse (int n)
```

```
{
```

```
    int rem, revNum = 0;
```

```
    while(n>0){
```

```
        rem = n%10;
```

```
        n = n/10;
```

```
        revNum = (revNum*10)+rem;
```

```
    }
```

```
    return revNum;
```

```
}
```
