

Technology in health care

Create a 6- page paper in APA format including a minimum of 4 to 5 references. Include the following elements in your paper: share why you chose the specific topic, the current relevance of material, how it is integrated into clinical practice, and how the information is used in clinical setting.

When you write your paper please use "subheadings" to be sure you are addressing everything the assignment is asking you to do.

EXAMPLE OF HOW TO SET UP YOUR PAPER:

Why I chose this topic

Then explain why you choose your topic

Lobbying legislators or local government for funds to support (whatever your issue trend is)

Then explain how you will go about lobbying, will you write a letter? What will be in the letter, give me details here

Current relevance of my topic in today's health care/ nursing OR how my topic influences health care/nursing today

then explain the current relevance of your topic or how it influences health care /nursing in todays world.

How your topic is integrated into clinical practice

Then describe how it is integrated or incorporated into current practice

How your topic is used in the clinical setting

Then give some examples of how your topic is used. (This area may overlap with how your topic is integrated into clinical practice)
