

	Tattoo done in		Tattoo done	No tattoo	Total
	commercial parlor	elsewhere			
Has hepatitis C	17	8		18	43
No hepatitis C	35	53		495	583
Total	52	61		513	626

	Tattoo done in		Tattoo done	No tattoo
	commercial parlor	elsewhere		
Has hepatitis C	39.53%	18.60%		41.86%
No hepatitis C	6.00%	9.09%		84.91%

The distribution of tattoo for people with hepatitis C is different from that for people without hepatitis C. There is a strong relationship between getting a tattoo and having hepatitis C.
