2021 HAPPIEST PLACES TO LIVE

CNN link

Note the impact of trust on both happiness and response to government interventions during the pandemic. It is clear that regardless of party alignment, government transparency is key to public happiness. In many Scandinavian countries citizens can easily access through a government portal how their tax dollars are spent.

Consider the following?

- What if any commonalities do you find among countries featured in this list?
- When you consider geography and climate, do you find any surprises?
- Based upon what you know about these parts of the world, which would you consider as a potential place to visit or live and why? Please do some research to support your decision.
- Go to open forum discussions to post your responses to these questions.
