

Your report should be written in a professional way. It should be arranged so that readers can process the information more easily and quickly. This can be accomplished by providing a well written report and clearly labeling each section. In addition, headings and subheadings should be used throughout the report so that a specific issue can be found quickly.

Your report should be typed, double-spaced on standard-sized paper (8.5" x 11") with 1" margins on all sides. You should use a clear font that is highly readable. APA recommends using 12 pt. Times New Roman font.

Please note that your report should include three major sections: The Title Page, Main Body, and References.

All sources MUST be cited and referenced in APA.

(References are only listed if cited within the body of the report).

Technical Specifications

- Provide a title page
- Use headings to outline each of the guiding questions
- Double-spaced on standard-sized paper (8.5" x 11") with 1" margins on all sides.
- Minimum of 800 words total
- Provide references in APA format

Explore the reasons/causes for kidney failure

CATD – MEDD110c Anatomy/Physiology/Pathology

Guiding Questions

1. Provide a list of the possible reasons/causes of kidney

failure (Rank the causes from “most common” to “least common”) For full marks, all causes need to be listed in ranking order. A paragraph (minimum of 3 sentences) of information is required for each cause, providing a simple explanation.

2. For each of the causes listed, provide: • Who is most at risk?

For full marks, each cause will require a listing of the various factors that put a person at risk of being susceptible to this cause.

• What things can be done to minimize the risk, and/or correct the problem?

I. Lifestyle changes

II. Medicinal changes – various forms of therapy

For full marks, a description and explanation of lifestyle changes and medicinal changes (therapies) to correct or improve their condition would be provided. These must be written in paragraph form, written in the student’s own words, using simple language to explain the how the changes would lead to an improved condition.

3. What are the long-term complications of kidney failure?

For full marks, a comprehensive list of all the complications would be listed, with explanations describing how these complications arise.

4. If permanent kidney failure happens, what are the various ways that one can choose to live without their kidneys? List the various ways, explaining how each method serves to replace the function of your kidney.

For full marks, a comprehensive list of all the methods used to stay alive without kidneys will be presented. Each method provided, a paragraph explanation (minimum of 3 sentences) will describe

how the alternative method works.

5. If you lost your kidneys at this moment in your life, which of the ways presented would you choose to remedy your situation, and why?

What unique things of your life are most suited to the remedy that you chose?

For full marks, provide a convincing argument of why your choice is the best choice for your unique circumstances in life. Each therapy will have its advantages and disadvantages. Your task will be to persuade the reader of why your therapy has advantages that outweigh the disadvantages.
