Related Content

(E.G., DELEGATION,
LEVELS OF PREVENTION,
ADVANCE DIRECTIVES)

Have knowledge of laws governing altered body image.

Underlying Principles

Body change should be expected

Body-image rehabilitation may be protracted

it is essential for nurses to understand what the patient is thinking and feeling throughout the rehabilitation process and which stage of psychological change the patient is working through.

Nursing Interventions

WHO? WHEN? WHY? HOW?

Educate the patient about his or her condition

Document all the improvements and problems encountered
