Currency

The article is current because the information was published on 2nd March 2020. Similarly, since it touches on recent technological changes and their impact on the labor force, the author has used timely information to provide scholars and researchers with exciting advances in technological progression. The marginalized group is the population to be highly affected because technology will take most of their jobs away. The information has not been revised or updated but is still critical to the research because all the info is UpToDate to the topic. All information used in the article from other sources appropriately links, and all the links are working. The links provide more information that will make the reader understand the topic better.

Relevance

The information presented in the article is essential in my topic because it illustrates the significant effects of technology advancement on the job market. Although the paper has concentrated on how technology will affect the Canadian labor market, the concepts apply to almost the whole world. Also, the information has answered my research question, considering that the author provides an overview of how the incorporation of personal computers in the 1980s donated to economic growth and enhanced demand for workers with technological expertise. The information is intended for researchers and academics interested in discovering how technology progression can impact the labor market mainly to the marginalized group. The data is at an appropriate level because I can comprehend efficiently with easy-to-understand

concepts and vocabulary. Before selecting this source, I had looked at several other sources, and the article can be used for a research paper because of its information.

Authority

The author of the article is Arif Jetha and published the article in The Conversation CA. The author is a scientist and researcher at the institute for work and health and a professor at the University of Toronto. Several institutions sponsor the author because he receives funding from the New Frontiers in Research Fund Grant and the Arthritis society. Also, The Conversation is provided funds by the National Research Foundations and eight other universities across the world. The author's credentials are provided in the article and are affiliated with the University of Toronto. The author is qualified to take this research because their educational qualifications and work background provide him with immense knowledge in research. Dr. Jetha has earned his doctorate of philosophy from the University of Toronto.

Furthermore, Jetha writes several other articles concerning the employees and employers, giving him significant research on employment and work-related impacts. The page provides the author's contact information, including email, Twitter, and website. The URL reveals that the source is commercial because it is .com, although most founding partners are universities.

Accuracy

The information present in the article is accurate and reliable because first, the author is an expert in the topic area. Secondly, every claim posted in the report is followed by a hyperlink to ensure that the readers can do extensive research from the information sources. This makes the article to be fair and factual. Upon reading the article, every hyperlink was working, and

educators could easily refer to the source. Also, the words are clear and do not have spelling or grammatical errors.

Purpose

The article aims to inform the readers concerning the ongoing research to understand the present literature on the upcoming studies and the potential challenges. The research intended creating insight on how the future of work will affect the health and labor market interaction of susceptible employees such as individuals with disabilities and youths (Jetha, 2020). The authors make their intentions clear by stating that their goal is to uncover possible issues from different groups due to technology advancement and inform personalized policies and programs to reduce the surprises and pressures.

Recommendation

The article explores a critical topic that can raise a lot of concerns soon. While many organizations and countries support technology advancement in reducing the cost of operation, it also has substantial effects on vulnerable populations such as the disabled and immigrants. This source is credible because its foundation and funds are from the eight universities worldwide and the National Research Foundation. Also, the article is written by reliable and specialized authors on specific topics. Finally, the mission of establishing the source is to reveal acquaintances and share emerging information.
