

Tourism Problems Institutional Affiliation ? *unclear title*

Tourism is one of the major economic activity ^{MF} in the country as it provides revenue for the government and ^{awkward} generations of employment opportunity, but it is also faced with problems such as tourist place ^s been destroyed by tourism which includes the scientific center of Kuwait and Kuwait beach.

^A The major problem facing tourism activities in Arab ^{WC} is the destructions ^{WF} [of Discovery ^{? we} places such as the scientific center of Kuwait.] ^{unclear} The scientific center of Kuwait is located in ^{is this relevant?} Salmiya Kuwait which serves as a center for environmental of education ^(in the) of Persian Gulf. The place is prone to damage because it contains art and architectures with designs of Arabic calligraphy. When ^{we} the tourist visits the area and most of them want to feel the symbolic models ^{PO} models? they can cause damage to them thus creating a major problem ^{like?} to such places. You never told me the type of damage.

The second place that is prone to destructions is Kuwait beach. The Kuwait beach is one of the beautiful places in the Persian Gulf making it more attractive for tourism ~~in the area~~. Kuwait beach also offers a great place to relax ^{inf.} (and a good environment for tourism) ^{inf. redundant} The major damage that tourism may cause to Kuwait beach is pollutions. ^{WF} The ^{WF} tourism may pollute the water by ^{awkward} letting harmful substances to the beach which can cause pollutions and water born diseases.

(Furthermore, the disease may spread and cause death to people living around the Kuwait beach.)
This is a stretch - you begin w/ pollution and ended with disease - FURTHERMORE is not a strong enough transition for this shift.
