

56-UP Assignment

Think of the video in terms of the stability of personality versus personality change. How have these people changed or remained the same in terms of personality? How would you rate each person depicted with the Five-Factor Model or HEXACO? Discuss the individuals in terms of 2 major personality theorists, e.g. Erikson, Maslow, Horney, Adler. The paper is a five page, double-spaced, 12-point font, analysis of the 56-up individuals in terms of these issues in personality. Note: this example is 12-point font and double spaced throughout. The length is 5 pages minimum, not including the title and reference pages. Seven pages is the maximum.

Use two characters for the analysis. This allows for a more in-depth analysis and contrasts between the characters. When doing your analysis remember to focus upon the theoretical application and use the story of the film as evidence for your interpretations. If you are referring to the director of the film, use Apted (2012) as the citation. Additional references are not necessary; an example of the text, Larsen, Buss, King & Ensley (2020) is in the reference page.
