

You are to choose a disease and write a complete detailed paper about it. It should include:

- What it is
- What it effects
- Who it effects
- How dangerous is it
- Is there a cure
- What parts of the body does it affect
- etc and more
- Every last detail about the disease. Every last detail that you can find out about it.

MAKE SURE...

- The disease is discussed in terms of how the pathology affects the organ system and its presentation in the individual. (Normal structure and function of the organ system, signs & symptoms of the disease, how the organ system is changed by the disease, current treatment, expected outcome and prevention should be included.)
- Demonstrates ability to analyze topic well and incorporate the researched material into a well thought out paper with appropriate sentence structure and grammar.
- References available on a work cited page and in line according to proper APA format
- The research paper must be in APA format, approximately 3-4 pages long with additional pages for the title and references.

**NO PLAGIARISM USE REFERENCES AND CITE IN APA
